

SingletonImplT

Catch::ISingleton

Catch::Singleton< Singleton
ImplT, InterfaceT, MutableInterfaceT >

The diagram illustrates a generic Singleton pattern. At the bottom is a box for the generic class `Catch::Singleton< Singleton ImplT, InterfaceT, MutableInterfaceT >`. Two arrows originate from this box: a red arrow pointing to `SingletonImplT` and a blue arrow pointing to `Catch::ISingleton`. This indicates that the generic class is specialized into the concrete implementation and the interface.
