

Catch::EventListener

```
classDiagram
    class CatchEventListenerBase["Catch::EventListenerBase"]
    class CatchEventListener["Catch::EventListener"]
    CatchEventListenerBase --|> CatchEventListener
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled "Catch::EventListenerBase". A blue arrow points vertically upwards from the top center of this box to the bottom center of a white box labeled "Catch::EventListener" positioned above it. This represents that "Catch::EventListenerBase" is the superclass and "Catch::EventListener" is the subclass.
