

SingletonImplT

Catch::ISingleton

Catch::Singleton< Singleton
ImplT, InterfaceT, MutableInterfaceT >

The diagram illustrates a generic Singleton pattern. At the bottom is a box for the generic class: `Catch::Singleton< Singleton ImplT, InterfaceT, MutableInterfaceT >`. Two arrows originate from this box: a red arrow pointing to a box labeled `SingletonImplT` at the top left, and a blue arrow pointing to a box labeled `Catch::ISingleton` at the top right. This represents the generic class being specialized into a concrete implementation and an interface.
